Objective

Passionate to learn new technologies and to excel innovative technology application. Seeking a challenging position which will enable me to continuously learn, create, innovate and simultaneously contribute to the short and long term goals of the organization effectively using technological & managerial skills.

Professional Summary

- TypeScript, React.js, Vue.js, Node.js, MongoDB, Express.js
- GitHub, JavaScript, VS Code, p5 Editor, Oracle SQL, ServiceNow, Redux (RTK), UI Libraries (MUI, Ant Design, Bootstrap)
- AWS, Microsoft Azure for deployment
- Deployment Tech Stack: Jenkins, AWS S3, Azure
- ITIL 4 Foundation Certification in IT Service Management
- Proficient in Agile methodology
- Extensive experience working on live products in production, actively used by end-users
- Knowledgeable in Virtual Machines administration, with expertise in both Windows and Linux environments.

Work Experience

Company: Tech Mahindra Ltd, Pune

Technical Support Associate- October 2019 – November 2020.

Domain: Information Technology.

Project Summary: Proficiently debugged and resolved customer application issues by leveraging expertise in HTML, CSS, and JavaScript within the Information Technology domain.

Roles and Responsibilities :

- Applied advanced technical knowledge to troubleshoot and resolve customer problems related to computer hardware, software applications, and client-specific equipment.
- Specialized in debugging client applications, employing HTML, CSS, and JavaScript to identify and rectify issues effectively.
- Successfully resolved customer inquiries by asking targeted questions and gathering information to pinpoint the source of problems.
- Led customers through a systematic process to fix software/application, hardware, or network issues.
- Utilized product information, client tools, and scripting, demonstrating a deep understanding of technical concepts and exceptional problem-solving skills to diagnose and resolve complex customer problems.

Internship

Company: AAKANKSHA Company

Full Stack Developer Intern – July 2021 – October 2021

Domain: Information Technology

Live Link: <https://epic-goodall-37eea0.netlify.app/>

Project Summary: Contribute in building up an Ecommerce platform using React.js, Commerce.js & Material UI

Roles and Responsibilities :

- We discuss what all features we should have in this project and what technologies could be used like bootstrap and etc
- We divide tasks equally among ourselves (5 team members), so that project is completed soon
- We used bootstrap contents for the featured products on the website and JavaScript async/await for the cart.
- We have also integrated Razor pay payment gateway.

Internship

Company: ChefAtHome FoodTech LLP

Full Stack Developer Intern – September 2021 – November- 2021

Domain: Information Technology

Project Live Link: <https://zangbox-supplierdashboard.herokuapp.com/>

Project Summary: Design & Webpages for the Supplier Dashboard being in the Inventory Team

Roles and Responsibilities :

- As soon as the designs arrive we use HTML, CSS, JavaScript to design the webpage according to the design
- We connect the Flask code (App.py) to MongoDB using SRV link so that every thing is saved in the backend
- We perform debugging to check the webpage if it is working perfectly (Both Front-end & Back-end)
- We push the code to GitHub and merge the repositories.
- We configure the needs of the client to filter out the details they want in an excel file using Web Scrapping.

Work Experience

Company: Nimap Infotech

Associate Software Developer → December 2021 – November 2023

Domain: Software Development

Summary: Working as a resource where I must work for a client and meet their requirements and deadline for software development purposes

Tech Stack : React JS, React-Redux, JavaScript, Html, CSS, UI (material Ui, chakra Ui, Chart JS, d3.js), Web Sockets, Node.js, REST API, Git

Roles and Responsibilities:

- Worked as an intern in company's internal projects where I had to develop recruitment portal of the company and resource management project

- Worked for client- **Flatworld Solutions** where I had to build an App for editing a large amount of data which was not possible on excel – had to implement search for approx. 5k+ data and at the same time make the fields editable and save it via Post Api integration
- Worked for client - **MIKO** where I had to create a table through API data such that if there are 50 intents coming up then there will be 50 rows of data which would be in pagination
Each intent consisted of age,question,answer,menu of options and respective buttons according to intent status/review status which had to be operational or either integrated by an API
Each intent was opened in create mode where we can edit, save and send the saved information via web socket connection to the bot
Each and every field has to be integrated by an api and search selections were implemented in them
We used react hook form in order to setValue when changes happen and then fetch those data via getValues when we have to save it and send to Bot
- Worked for **Arcgen Consulting** where I had worked for Dr Voxel and Vizzhy web app.

DR Voxel :

- 1) Doctor Dashboard : Build UI and integrate to api according to the figma and control access for doctors to add medicines and tasks to the patient and track their vitals.
- 2) Patient Dashboard : Build UI and integrate to api according to the figma and set read-only for only showing the data entered by doctor and let patient to enter their vitals so that doctor can check it and add docs upload and etc

Vizzhy :

- 1) Setup the project with routing, user accesses, redux to integrate it with Automatic Speech Recognition
 - 2) Doctor Dashboard : Setup Doctor Dashboard to check the vitals and daily appointments and to set a careplan for patient where they can upload vitals, set weightage to correct diet, add tasks like eat 5 apples everyday and add medications, escalation tracking from patients and etc
 - 3) Patient Dashboard : Setup Patient Dashboard to add their vitals according to UI from figma and set appointments on check of doctor appointments from the api, view careplan set by doctor in calendar format careplan UI
 - 4) Dietician Dashboard : Set Dietician Dashboard to set diet and see the pie chart of the assigned diet to the patient and check their meals and set the nutrients after the careplan is done for the respective patient, worked on to show the careplan in readonly mode and check appointments from patients UI
 - 5) Caregiver Dashboard : UI according to figma and access to add new patient with payment and then onboarding process of patient where patient fills all their medications, illness, issues and registers themselves after payment.
- worked for client **TrackTrans** where we have to develop their WMS(Warehouse management system) to track stocks, reports and returns, transfers to different warehouses for **H3g & Virgin Media** clients to track the drums and packing of the stocks after a successful change of plans ,stealing stocks from same warehouse/jobs and adding it to the current job which required some of the logical based object building integration to apis with required payload and show the read-only or editable according to the access provided to the respective user, implementing translations for different regions across UK to all the components, use of re-usable components like modals, popover, api calls for component under re-usability and then display UI. Daily Reports on scrum.
 - Great Experience working with the redux state management and working with graphs and table format.
 - Experienced working with Gitlab, Github, bit bucket , Jira, AWS

Professional Courses & Platforms Used	
Courses	<ul style="list-style-type: none"> Python(2021), JavaScript, SQL(2021), HTML-5, CSS-3, React.js, MongoDB, Flask(2021)
Platforms	<ul style="list-style-type: none"> Operating System - Windows ,Linux , GitHub , p5 editor, Visual Studio Code, Code.org, Oracle Database 11g, Git Bash, Google Sheets , Citrix Director, Gemalto Cloud Admin, Active Directory- User accounts , Windows , MS Office
Technologies	<ul style="list-style-type: none"> Typescript, Node.js, React JS, Redux (RTK), SQL, Service Now, MongoDB, CSS , JavaScript, Vue.js, Node.js , Express.js, UI Libraries (MUI, Ant D, Bootstrap)

Academic Record					
S.NO.	Standard	School/College	Board/University	Year	Percentage (%)
1.	B. Tech (Electronics and Communication Engineering)	Institute of Technical Education and Research	SOA University	2015-2019	63.27
3.	Class XII	St. Mary's English High School , Bistupur	CBSE	2015	59.6
3.	Class X	St. Mary's English High School , Bistupur	CBSE	2013	69.73

Industrial Training		
Training Institute	Period of Training	Description
NIIT	60 days (15 th may -13 th July ,2019)	Learned about Core Java and Basics of Advance Java

Extra-Curricular Activities
<ul style="list-style-type: none"> Trekking, Long drive (Himachal, J&K, Ladakh, East zone India, West zone India) Computer Games (NFS, FIFA, CS GO, PUBG, GTA V) Cooking Outdoor Games (Football, Badminton, Volleyball, Cricket, Cycling)

Achievements

- First Prize for Counterstrike – Global offensive from Gaming Hub (Bhubaneswar)
- Runner up team in Football tournament hosted by SOA University (ECE Team)
- Best Team Player (CenturyLink SD, Tech Mahindra)

Strength

- Convincing skills
- Smart Work + Hard work
- Disciplined, Sincere in Work.
- Positive attitude
- Good Problem Solving Skills
- Charismatic
